

CEMENT

AND

CEMENT MANUFACTURE

INCORPORATING "PORTLAND CEMENT"

Published by Concrete Publications Ltd., 20 Dartmouth Street, London, S.W.1.

INDEX to VOL. V, 1932.

	PAGE		PAGE
Absorption of water by cement	103	Gronow, H. F. von, and Schwiete, H. E., on Exothermic effect of Portland cement clinker formation from blastfurnace slag and limestone	392
Additions on the chemical resistance of Portland cement to water, Effect of, by N. Gundius-Assarsson	226	Haegermann, G., on Preliminary tests for cement of the new German Standard specification, 91; on Reaction between lime and silica, alumina, and iron oxide, 153; on Tricalcium silicate	246
Additions to cement raw meal containing blastfurnace slag, Effect of, by M. Paschke and W. Meyer	83	Hamada, M., on Testing by small plastic mortar briquettes	121
Additions to Portland cement on its mechanical properties, Effect of, by P. O. Budnikoff and M. I. Nekritsch	83	Hess, M., on Portland cement with the maximum possible lime content	107
Ageing of cement under the influence of the atmosphere, by V. M. Anzlovor	361	Honus, O. F., on Graphic method for determining the constituents of Portland cement from the chemical analysis	356
Air separation for superfine cement, Multi-chamber mills with, by A. B. Helbig	108	Itami, Eiichiro, on Mill lining plates	122
Alite, Tricalcium silicate and, by E. Janecke and R. Brill	314a	Janecke, E., and Brill, R., on Tricalcium silicate and alite	314a
Alkalis by the Lawrence Smith method, Determination of, by C. Prussing	225	Jennings, J. H., on Properties of Portland cement particles smaller than 10 microns	99
Alumina, and iron oxide, Reaction between lime and silica, by G. Haegermann	153	Jorns, G., and Krauss, F., on Investigation of cement by vapour pressure measurements	119
Aluminous and Portland cements, Mixing, by K. Koyanagi	122	Jung, W. N., on Burnt cement clinker brick	350
Analysis, A graphic method for determining the constituents of Portland cement from the chemical, by O. F. Honus	356	Killig, F., on Repeated setting of Portland cement	226
Analysis for cements, Scheme of	98	Konarzewski, J., and Lukasewicz, W., on The phenol method for determining the free lime in cement	391
Association of German Portland Cement Manufacturers for 1930-31, Report of the Kiln Commission of the	83	Koyanagi, K., on Hardening of Portland cement, 214; on Hydration of calcium aluminate in Portland cement, 296; on Mixing aluminous and Portland cements, 122; on Modification and calibration of Kuhl's sedimentation apparatus	371
Atmosphere, Ageing of cement under the influence of the, by V. M. Anzlovor	361	Krauss, F., and Jorns, G., on Investigation of cement by vapour pressure measurements	119
AUTHORS:		Krauss, F., and Schriever, W., on Research on Portland cement by means of vapour pressure measurements	183
Anzlovor, V. M., on Ageing of cement under the influence of the atmosphere	361	Kuhl, H., on Colloidal cement hardening, 81; on Reactions between water and cement, 246; on Hydraulic hardening as a surface reaction	155
Ashkenasi, G. A., on Behaviour of Portland cement when heated, 240; on Estimation of free lime in cement	63, 93	Kuhl, H., and Rasch, R., on Thermal dissociation of ferric oxide in cement burning	71
Assarsson, N. Gundius, on Effect of additions on the chemical resistance of Portland cement to water	226	Kuhl, H., and Thilo, F., on Examination of the kiln lining of an arrested rotary kiln	149
Brill, R., and Janecke, E., on Tricalcium silicate and alite	314a	Kuhl, H., and Tippmann, F. F., on The hardening of Portland cement	19
Budnikoff, P. P., and Nekritsch, M. I., on Effect of additions to Portland cement on its mechanical properties	83	Lacey, W. N., and Shirley, H. E., on Changes occurring within a Portland cement kiln	322
Busmeyer, Hans, on Heat economy in the cement industry	52, 183, 219, 278	Lea, F. M., on Water in set cement	395
Davis, A. C., on Constancy of volume of Portland cement, 253; on Determination of setting time of Portland cement, 168; on Fineness and sieving of Portland cement, 72; on Tensile strength tests of Portland cement	441	Loventhal, J. E., on The hardening of Portland cement	87
Dorsch, K. E., on Hardening and corrosion of cement	337, 426	Luftschitz, H., on The boiling test	81
Eitel, W., on Thermal basis of cement burning	154	Lukasewicz, W., and Konarzewski, J., on The phenol method for determining the free lime in cement	391
Endell, K., on Magnesite brick resistant to temperature changes, suitable for lining the clinkering zone	392	Margarit, A., on New cement works at Cordoba, Spain, 33; on The Portland cement industry in Spain	97
Frey, O., on Is calcium chloride of equal value to gypsum as an addition to clinker?	83	Matsuura, Jiro, on Japanese Portland cement clinkers	122
Gierst-Hedstrom, S., and Werner, D., on Relation between the physico-chemical properties of cement	150	Meyer, W., and Paschke, M., on Effect of additions to cement raw meal containing blastfurnace slag	83
Gilbert, Wm., on Heat transmission in rotary kilns, 417; on The rotary kiln in cement manufacture	36, 158, 194	Mussgnug, G., and Goffin, O., on Free lime in Portland cement and clinker	329
Goffin, O., and Mussgnug, G., on Free lime in Portland cement and clinker	329	Nacken, Prof., on Ways in which water is combined in cement	156
		Nagai, S., on Hydrothermal synthesis of calcium hydro-aluminates	205
		Nagase, K., on Caloric value of powdered coal	122

	PAGE		PAGE
Nekritsch, M. T., and Budnikoff, P. P., on Effect of additions to Portland cement on its mechanical properties ...	83	Clinker, Is calcium chloride of equal value to gypsum as an addition to ? by O. Frey ...	83
Paschke, M., and Meyer, W., on Effect of additions to cement raw meal containing blastfurnace slag ...	83	Clinkering zone, Magnesite brick resistant to temperature changes suitable for lining the, by K. Endell ...	392
Pooley, H., on Green Island cement works, Hong Kong ...	80, 304, 348, 384, 434	Clinker, Japanese Portland cement, by Hiro Matsuura ...	122
Prussing, C., on Determination of alkalis by the Lawrence Smith method ...	225	Coal, Calorific value of powdered, by K. Nagase ...	122
Rasch, R., and Kühl, H., on Thermal dissociation of ferric oxide in cement burning ...	71	Coarse material from slurry, Separation of ...	367
Schirm, E., on Rotary kilns of high output ...	315	Colloidal cement hardening, by H. Kühl ...	81
Schriever, W., and Krauss, F., on Research on Portland cement by means of vapour pressure measurements ...	183	Concrete, Studies of Portland cement in relation to the disintegration of ...	285
Schwiete, H. E., on The zone of ring formation in a rotary kiln ...	247	Constancy of volume of Portland cement, by A. C. Davis ...	253
Schwiete, H. E., and von Gronow, H. E., on Exothermic effect of Portland cement clinker formation from blastfurnace slag and limestone ...	392	Constituents of Portland cement from the chemical analysis, A graphic method for determining the, by O. F. Honus ...	356
Shimizu, Yosomatsu, on Slag-aluminous cement ...	121	Cordoba, Spain, New cement works at, by A. Margarit ...	33
Shirley, H. E., and Lacey, W. N., on Changes occurring within a Portland cement kiln ...	322	Corrosion of cement, The hardening and, by K. E. Dorsch ...	337, 426
Steiner, D., on Chemical structure and strength of cements, 249; on Fine grinding and the quality of cements, 225; on Grading analysis and the properties of cements ...	209	Cupboard for cement testing, A damp ...	211, 247
Thilo, F., and Kühl, H., on Examination of the kiln lining of an arrested rotary kiln ...	149	Design for a modern cement plant ...	201
Tippmann, F. F., on The hardening of Portland cement ...	236	Determining the constituents of Portland cement from the chemical analysis, A graphic method for, by O. F. Honus ...	356
Tippmann, F. F., and Kühl, H., on The hardening of Portland cement ...	10	Disintegration of concrete, Studies of Portland cement in relation to the ...	285
Waclaw, F., on Determination of silica in cements ...	82	Exothermic effect of Portland cement clinker formation from blastfurnace slag and limestone, by H. E. Schwiete and H. E. von Gronow ...	392
Watson, D. Irvine, on Determination of sulphur present as sulphide in Portland cement ...	49	Extractor, Cement silo ...	333
Weisberger, W., on Fine grinding and the strength of cement ...	84	Ferric oxide in cement burning, Thermal dissociation of, by H. Kühl and T. Rasch ...	71
Werner, D., on Water solubility of cements ...	82	Fifty years in the cement industry ...	28
Werner, D., and Gieritz-Hedstrom, S., on Relation between the physico-chemical properties of cement ...	150	Fine grinding and the quality of cements, by D. Steiner ...	225
Weyer, L., on Mineral formation in kaolin-lime melts, 314; on The reaction between kaolin and lime on static heating ...	81	Fine grinding and the strength of cement, by W. Weisberger ...	84
Wurzner, K., on The problem of hardening ...	391	Fineness and sieving of Portland cement, by A. C. Davis ...	72
Zollinger, R., on The theory of cement formation, 67; on The theory of the rotary kiln, 123; on The thermochemistry of cement burning ...	271	Formation, The theory of cement, by Rudolf Zollinger ...	67
Belgian cement industry, The ...	204	Free lime in cement, The estimation of, by G. A. Ashkenasi ...	63, 93
Blastfurnace cement, British Standard Specification for Portland ...	235	Free lime in Portland cement by heating, The production of, by G. E. Bessey ...	233
Blastfurnace slag and limestone, Exothermic effect of Portland cement clinker formation from, by H. E. Schwiete and H. E. von Gronow ...	392	Free lime in Portland cement and clinker, by O. Goffin and G. Mussgnug ...	329
Blastfurnace slag, Effect of additions to cement raw meal containing, by M. Paschke and W. Meyer ...	83	Free lime in cement, The phenol method for determining the, by J. Konarszewski and W. Mukasewicz ...	391
Boiling test, The, by H. Luftschütz ...	81	German cement industry in 1931, The ...	92
Brick, Burnt cement clinker, by W. M. Jung ...	390	German Portland Cement Manufacturers, Association of ...	153
Briquettes, Testing by small plastic mortar, by M. Hamada ...	121	German Standard Specification for Cements, New ...	103
British Standard Specification for Portland-blastfurnace cement ...	235	German Standard Specification, Preliminary tests for cement of the, by G. Haegermann ...	91
Building Research Board, Report of the ...	365	Grading analysis and the properties of cements, by D. Steiner ...	209
Burning process, New cement ...	400	Green Island cement works, Hong Kong, by H. Pooley, Jun. ...	80, 304, 348, 384, 434
Burning, Thermal basis of cement, by W. Eitel ...	154	Grinding and the quality of cements, Fine, by D. Steiner ...	225
Burning, The thermochemistry of cement, by R. Zollinger ...	271	Grinding and the strength of cement, Fine, by W. Weisberger ...	84
Calcium aluminate in Portland cement, Hydration of, by K. Koyanagi ...	296	Gypsum as an addition to clinker, Is calcium chloride of equal value to ? by O. Frey ...	83
Calcium chloride of equal value to gypsum as an addition to clinker ? Is, by G. Frey ...	83	Hardening and corrosion of cement, The, by K. E. Dorsch ...	337, 426
Calcium hydro-aluminates, Hydrothermal synthesis of, by S. Nagai ...	205	Hardening as a surface reaction, Hydraulic, by H. Kühl ...	155
Calcium silicates, Synthesis of ...	173	Hardening, Colloidal cement, by H. Kühl ...	81
Calorific value of powdered coal, by K. Nagase ...	122	Hardening of Portland cement, by K. Koyanagi ...	214
Cement formation, The theory of, by Rudolf Zollinger ...	67	Hardening of Portland cement, The, by F. F. Tippmann ...	236
Cement industry in 1930 and 1924, The ...	144	Hardening of Portland cement, The, by H. Kühl and F. Tippmann ...	19
Cements, Water solubility of, by D. Werner ...	82	Hardening of Portland cement, The, by J. E. Loventral ...	87
Census of production of the cement industry ...	144	Hardening, The problem of, by K. Wurzner ...	391
Centrifugal pump for cement slurry, A new ...	186	Heat economy in the cement industry, by H. Bussmeyer ...	52, 133, 219, 278
Chemical analysis, A graphic method for determining the constituents of Portland cement from the, by O. F. Honus ...	356	Heat transmission in rotary kilns, by W. Gilbert ...	417
Chemical resistance of Portland cement to water. Effect of additions on the, by N. Gundius-Assarson ...	226	Heat, Behavior of, of Portland cement when, by G. A. Ashkenasi ...	240
Chemical structure and strength of cements, by D. Steiner ...	249	Heating, The production of free lime in Portland cement by, by G. E. Bessey ...	233
Clinker brick, Burnt cement, by W. N. Jung ...	390	Helbig, A. B., on Multi-chamber mills with air separation for superfine cement ...	108
Clinker formation from blastfurnace slag and limestone, Exothermic effect of Portland cement, by H. E. Schwiete and H. E. von Gronow ...	392	Hong Kong, The new works of the Green Island Cement Co. Ltd., by H. Pooley ...	80, 348, 384, 434
Clinker, Free lime in Portland cement and, by O. Goffin and G. Mussgnug ...	320	Hydration of calcium aluminate in Portland cement, by K. Koyanagi ...	296
		Hydrothermal synthesis of calcium hydro-aluminates, by S. Nagai ...	205

	PAGE		PAGE
Hydro-aluminates, Hydrothermal synthesis of calcium, by S. Nagai	205	Ring formation in a rotary kiln, The zone of, by H. E. Schwiete	247
Iron oxide, Reaction between lime and silica, alumina and, by G. Haegemann	153	Rotary kiln, Examination of the kiln lining of an arrested, by H. Kühl and F. Thilo	140
Japanese Portland Cement Association	121	Rotary kiln in cement manufacture, The, by W. Gilbert	36, 158, 191
Japanese Portland cement clinkers, by Jiro Matsuura	383	Rotary kiln, The future of the	123
Japanese Standard Specification for Portland Cement	246	Rotary kiln, The theory of the, by R. Zollinger	247
Kaiser Wilhelm Institute for research on the silicates, The	3144	Rotary kiln, The zone of ring formation in a, by H. E. Schwiete	417
Kaolin-lime melts, Mineral formation in, by I. Weyer	81	Rotary kilns, Heat transmission in, by W. Gilbert	315
Kaolin and lime on static heating, The reaction between, by I. Weyer	322	Salt waters, Portuguese regulations for Portland cement to be used in	277
Kiln, Changes occurring within a Portland cement, by W. N. Lacey and H. E. Shirley	83	Sedimentation apparatus, Modification and calibration of Kühls, by K. Koyanagi	371
Kiln Commission of the Association of German Portland Cement Manufacturers for 1930-31, Report of the	36, 158, 194	Separation of coarse material from slurry	367
Kiln in cement manufacture, The rotary, by W. Gilbert	149	Setting time of Portland cement, Determination of, by A. C. Davis	166
Kiln lining of an arrested rotary kiln, Examination of the, by H. Kühl and F. Thilo	191	Siam, Cement in	60
Kiln, The future of the rotary	400	Sieving of Portland cement, Fineness and, by A. C. Davis	72
Kiln, The Lepol	123	Silica, alumina, and iron oxide, Reaction between lime and, by G. Haegemann	153
Kiln, The theory of the rotary, by R. Zollinger	247	Silica in cements, Determination of, by F. Wacław	82
Kiln, The zone of ring formation in a rotary, by H. E. Schwiete	417	Silicates, Synthesis of calcium	173
Kilns, Heat transmission in rotary, by W. Gilbert	315	Silicates, The Kaiser Wilhelm Institute for research on the	246
Kilns of high output, Rotary, by E. Schirm	371	Silo extractor, Cement	333
Kühl's sedimentation apparatus, Modification and calibration of, by K. Koyanagi	225	Slag-aluminous cement, by Yosomatsu Shimizu	121
Lawrence Smith method, Determination of alkalis by the, by C. Prussing	400	Slurry, A new centrifugal pump for cement	186
Lepol kiln, The	153	Slurry, Separation of coarse material from	367
Lime and silica, alumina, and iron oxide, Reaction between, by G. Haegemann	107	Slurry transport pump	85
Lime content, Portland cement with the maximum possible, by M. Hess	391	Smith method, Determination of alkalis by the Lawrence, by C. Prussing	225
Lime in cement, The phenol method for determining the free, by J. Konarzewski and W. Lukaszewicz	63, 93	Sodium compounds in Portland cement	269
Lime in cement, The estimation of free, by G. A. Ashkenasi	233	Spackmann, The late Mr. C.	122
Lime in Portland cement by heating, The production of free, by G. E. Bessey	329	Spain, New cement works at Cordoba, by A. Margarit	33
Lime in Portland cement and clinker, Free, by O. Goffin and G. Musgnug	81	Spain, The Portland cement industry in, by A. Margarit	97
Lime on static heating, The reaction between kaolin and, by I. Weyer	392	Specification for Cements, New German Standard	193
Limestone, Exothermic effect of Portland cement clinker formation from blastfurnace slag and, by H. F. Schwiete and H. E. von Gronow	392	Specification for Portland-blastfurnace Cement, British Standard	235
Lining the clinkering zone, Magnesite brick resistant to temperature changes suitable for, by K. Endell	183	Specification for Portland Cement, Japanese Standard	393
Measurements, Research on Portland cement by means of vapour pressure, by F. Krauss and W. Schriever	122	Specification, Preliminary tests for cement of the new German standard specification, by G. Haegemann	91
Mill lining plates, by Eiichiro Itami	108	Storage on cement, The effect of	129
Mills with air separation for superfine cement, Multi-chamber, by A. B. Helbig	3144	Strength of cement, Fine grinding and the, by W. Weisberger	84
Mineral formation in kaolin-lime melts, by I. Weyer	201	Strength of cements, Chemical structure and, by D. Steiner	249
Modern cement plant, Design for a	108	Strength tests of Portland cement, Tensile, by A. C. Davis	441
Multi-chamber mills with air separation for superfine cement, by A. B. Helbig	99	Sulphur present as sulphide in Portland cement, Determination of, by D. Irvine Watson	49
Particles smaller than 10 microns, Properties of Portland cement, by J. H. Jennings	46	Surface reaction, Hydraulic hardening as a, by H. Kühl	155
PATENTS:		Technical and physico-chemical properties of cement, Relation between the, by D. Werner and S. Gierzt-Hedstrom	150
Ball mills	118	Tensile strength tests of Portland cement, by A. C. Davis	441
Burning cement, lime ores, etc.	61, 118, 151, 229, 266	Test, The boiling, by H. Luftschitz	81
Cements	61	Testing, A damp cupboard for cement	211, 247
Grinding, crushing, etc., mills	229	Testing by small plastic mortar briquettes, by Minoru Hamada	121
Magnesian Portland cement	151	Tests for cement of the new German Standard Specification, by G. Haegemann	91
Mixing systems	228	Tests of Portland cement, Tensile strength, by A. C. Davis	441
Paper sacks	266	Thermal basis of cement burning, by W. Eitel	151
Portland and like cements	47, 229, 266, 298	Thermal dissociation of ferric oxide in cement burning, by H. Kühl and R. Rasch	71
Portland cement	151	Thermochemistry of cement burning, by R. Zollinger	271
Rotary cooling drums	228	Tricalcium silicate, by G. Haegemann	246
Slag cements	46, 61, 62, 118, 151, 228, 266, 298	Tricalcium silicate and alite, by E. Jancke and R. Brill	311A
Waterproofing cement	391	Vapour pressure measurements, Investigation of cement by the, by F. Krauss and G. Jorns	119
Patents relating to cement, Recent	150	Vapour pressure measurements, Research on Portland cement by means of, by F. Krauss and W. Schriever	183
Phenol method for determining the free lime in cement, The, by J. Konarzewski and W. Lukaszewicz	291	Volume of Portland cement, Constancy of, by A. C. Davis	253
Physico-chemical properties of cement, Relation between the technical and, by D. Werner and S. Gierzt-Hedstrom	122	Water and cement, Reactions between, by H. Kühl	246
Plant, Design for a modern cement	122	Water by cement, Absorption of	105
Plates, Mill lining, by Eiichiro Itami	277	Water, Effect of additions on the chemical resistance of Portland cement to, by N. Gundius-Assarson	226
Portland cements, Mixing aluminous and, by K. Koyanagi	144	Water in set cement, by F. M. Lea	395
Portuguese regulations for Portland cement to be used in salt waters	186	Water is combined in cement, Ways in which, by Prof. Nacken	156
Production figures for the cement industry, Census of Pump for cement slurry, A new centrifugal	85	Water solubility of cements, by D. Werner	82
Pump, Slurry transport
